

CLAIM AMENDMENTS

RECEIVED

JAN 24 2003

Technology Center 2600

The claims have been amended as follows:

1. (Amended) A method comprising:

using a processor to generate [generating] a first set of commands for an imaging device during a first time interval, the first set of commands being associated with a first task to be performed by the imaging device;

using the processor to generate [generating] a second set of commands for the imaging device during a second time interval that overlaps the first time interval, the second set of commands being associated with a second task to be performed by the imaging device;

transmitting the first set of commands to the imaging device during a third time interval;

and

transmitting the second set of commands to the imaging device during a fourth time interval that does not overlap the third time interval.

17. (Amended) A method comprising:

using a processor to set up and capture [setting up and capturing] a first frame, including transmitting a first set of commands;

using the processor to set up and capture [setting up and capturing] a second frame, including transmitting a second set of commands; and

preventing the transmission of the first set of commands from being interleaved with the transmission of the second set of commands.
